CONTENTS OF VOLUME 59

Number 1, 14 July 1971

Brown, N. C., Inhibition of Bacterial DNA Replication by 6-(*p*-Hydroxyphenylazo)-uracil: Differential Effect on Repair and Semi-conservative Synthesis in *Bacillus subtilis* 1

Matzura, H., Molin, S. and Maaløe, O., Sequential Biosynthesis of the β and β' Subunits of the DNA-dependent RNA Polymerase from *Escherichia coli* 17

Fan, H. and Penman, S., Regulation of Synthesis and Processing of Nucleolar Components in Metaphase-arrested Cells 27

Paoletti, J. and Le Pecq, J.-B., Resonance Energy Transfer between Ethidium Bromide Molecules bound to Nucleic Acids. Does Intercalation Wind or Unwind the DNA Helix? 43

Miller, C. G. and Roth, J. R., Recessive-Lethal Nonsense Suppressors in *Salmonella typhimurium* 63

Jost, P., Libertini, L. J., Hebert, V. C. and Griffith, O. H., Lipid Spin Labels in Lecithin Multilayers. A Study of Motion Along Fatty Acid Chains 77

Greer, J., Three-dimensional Structure of Abnormal Human Haemoglobins Kansas and Richmond 99

Greer, J., Three-dimensional Structure of Abnormal Human Haemoglobins M Hyde Park and M Iwate 107

Schleif, R., Greenblatt, J. and Davis, R. W., Dual Control of Arabinose Genes on Transducing Phage λ *dara* 127

Jori, G., Gennari, G., Toniolo, C. and Scoffone, E., Probing the Topography of Proteins in Solution by Photosensitized Oxidation. The Catalytic Region of Papain 151

Winkler, F. K. and Dunitz, J. D., The Non-planar Amide Group . . 169

Hartwell, L. H., Genetic Control of the Cell Division Cycle in Yeast. II. Genes Controlling DNA Replication and its Initiation 183

Bourgaux, P., Bourgaux-Ramoisy, D. and Seiler, P., The Replication of the Ring-shaped DNA of Polyoma Virus. II. Identification of Molecules at Various Stages of Replication 195

Letters to the Editor—

Fritsch, A. and Worcel, A., Symmetric Multifork Chromosome Replication in Fast-growing *Escherichia coli* 207

Kretsinger, R. H., Dangelat, D. and Bryan, R. F., Crystal Data for Low Molecular Weight Albumins of Carp 213

To, C. M., Quaternary Structure of Glutamate Decarboxylase of *Escherichia coli* as revealed by Electron Microscopy 215

Jordan, B. R. and Monier, R., 5 s RNA Molecules Formed by Reassociation of Separated Fragments 219

Notani, N. K., Genetic and Physical Properties of Unintegrated Donor DNA Molecules during *Hemophilus* Transformation . . . 223

Number 2, 28 July 1971

Rosbash, M. and Penman, S., Membrane-associated Protein Synthesis of Mammalian Cells. I. The Two Classes of Membrane-associated Ribosomes 227

Rosbash, M. and Penman, S., Membrane-associated Protein Synthesis of Mammalian Cells. II. Isopycnic Separation of Membrane-bound Polyribosomes 243

Smith, C. A., Jordan, J. M. and Vinograd, J., *In vivo* Effects of Intercalating Drugs on the Superhelix Density of Mitochondrial DNA Isolated from Human and Mouse Cells in Culture 255

Smith, T. F. and Sadler, J. R., The Nature of Lactose Operator Constitutive Mutations 273

Huang, H. H., Fenrych, W., Pawelkiewicz, J. and Johnson, B. C., Synthesis of Specific Transfer Ribonucleic Acids during Methionine Starvation in *Escherichia coli* 113-3 307

Terzaghi, E., Alternative Pathways of Tail Fiber Assembly in Bacteriophage T4? 319

Guha, A., Szybalski, W., Salser, W., Bolle, A., Geiduschek, E. P. and Pulitzer, J. F., Controls and Polarity of Transcription during Bacteriophage T4 Development 329

Bretscher, M. S., A Major Protein which Spans the Human Erythrocyte Membrane 351

Cashmore, A. R., Brown, D. M. and Smith, J. D., Selective Reaction of Methoxyamine with Cytosine Bases in Tyrosine Transfer Ribonucleic Acid 359

Letters to the Editor—

Cohen, C., Harrison, S. C. and Stephens, R. E., X-ray Diffraction from Microtubules 375

Arnott, S., Investigation of the Crystal and Molecular Symmetry of DNA using X-ray Intensity Statistics 381

Donohue, J., The Crystal Symmetry of DNA: Has It Been Proven? . 385

NUMBER 3, 14 AUGUST 1971

KELLETT, G. L. and SCHACHMAN, H. K., Dissociation of Hemoglobin into Subunits. Monomer Formation and the Influence of Ligands . . . 387

KELLETT, G. L., Dissociation of Hemoglobin into Subunits. Ligand-linked Dissociation at Neutral pH 401

DICKERMAN, H. W. and SMITH, B. C., Formylmethionyl Transfer Ribonucleic Acid Transformylase: The Specific Interaction of the Enzyme with its Transfer Ribonucleic Acid Substrate 425

KOCH, A. L., Energy Expenditure is Obligatory for the Downhill Transport of Galactosides 447

PHILLIPS, S. L., Termination of Messenger RNA Translation in a Temperature-sensitive Mutant of *Escherichia coli* 461

ZUCKERKANDL, E., DERANCOURT, J. and VOGEL, H., Mutational Trends and Random Processes in the Evolution of Informational Macromolecules . 473

BROWN, R. D. and HASELKORN, R., Synthesis and Maturation of Cytoplasmic Ribosomal RNA in *Euglena gracilis* 491

PRESCOTT, D. M., KATES, J. and KIRKPATRICK, J. B., Replication of Vaccinia Virus DNA in Enucleated L-cells 505

HARDWICKE, P. M. D. and HANSON, J., Separation of Thick and Thin Myofilaments 509

MIZUNO, N. S., STOOPS, C. E. and PEIFFER, R. L., JR., Nature of the DNA Associated with the Nuclear Envelope of Regenerating Liver. . . 517

LETTERS TO THE EDITOR—

KENDRICK-JONES, J., SZENT-GYÖRGYI, A. G. and COHEN, C., Segments from Vertebrate Smooth Muscle Myosin Rods. 527

HARRISON, R. G., LOWEY, S. and COHEN, C., Assembly of Myosin . . 531

GARFINKLE, B. D. and TERSHAK, D. R., Effect of Temperature on the Cleavage of Polypeptides during Growth of LSc Poliovirus . . 537

Index to Volume 59

Albumins, low molecular weight from carp, crystal data, 213
Amide non-planar group, 169
Arabinose gene dual control on transducing phage λ*dara*, 127
Arnott, S., Investigation of the crystal and molecular symmetry of DNA using X-ray intensity statistics, 381

Bacillus subtilis, bacterial DNA replication inhibited by 6-(*p*-hydroxyphenylazo)-uracil, 1
Bacteriophage, dual control of arabinose genes on transducing phase λ*dara*, 127
— T4, alternative pathways of tail fiber assembly, 319
— — development, controls and polarity of transcription, 329
Biosynthesis, sequential, of the β and β′ subunits of the DNA-dependent RNA polymerase from *Escherichia coli*, 17
Bolle, A. (see also Guha, A.), 329
Bourgaux-Ramoisy, D. (see also Bourgaux, P.), 195
Bourgaux, P., Bourgaux-Ramoisy, D. & Seiler, P., The replication of the ring-shaped DNA of polyoma virus. II. Identification of molecules at various stages of replication, 195
Bretscher, M. S., A major protein which spans the human erythrocyte membrane, 351
Brown, D. M. (see also Cashmore, A. R.), 359
—, N. C., Inhibition of bacterial DNA replication by 6-(*p*-hydroxyphenylazo)-uracil: differential effect on repair and semi-conservative synthesis in *Bacillus subtilis*, 1
—, R. D. & Haselkorn, R., Synthesis and maturation of cytoplasmic ribosomal RNA in *Euglena gracilis*, 491
Bryan, R. F. (see also Kretsinger, R. H.), 213

Carp low molecular weight albumins, crystal data, 213
Cashmore, A. R., Brown, D. M. & Smith, J. D., Selective reaction of methoxyamine with cytosine bases in tyrosine transfer ribonucleic acid, 359
Chromosome replication, symmetric multifork, in fast-growing *Escherichia coli*, 207
Cohen, C. (see also Harrison, R. G.), 531
—, — (— — Kendrick-Jones, J.), 527
—, —, Harrison, S. C. & Stephens, R. E., X-ray diffraction from microtubules, 375
Crystal and molecular symmetry of DNA by using X-ray intensity statistics, 381
— data from low molecular weight albumins of carp, 213
— symmetry of DNA and whether it has been proved, 385
Cytoplasmic ribosomal RNA synthesis and maturation in *Euglena gracilis*, 491
Cytosine bases, selective reaction with methoxyamine in tyrosine tRNA, 359

Dangelat, D. (see also Kretsinger, R. H.), 213
Davis, R. W. (see also Schleif, R.), 127
Decarboxylase, glutamate, of *Escherichia coli*, quaternary structure as revealed by electron microscopy, 215
Deoxyribonucleic acid, bacterial, replication inhibited by 6-(*p*-hydroxyphenylazo)-uracil in *Bacillus subtilis*, 1
— — crystal symmetry and whether it has been proved, 385
— —-dependent RNA polymerase from *Escherichia coli*, sequential biosynthesis of the β and β′ subunits, 17
— —, genes in yeast controlling replication and initiation, 183
— — helix, is it wound or unwound by intercalation of ethidium bromide, 43
— —, investigation of the crystal and molecular symmetry of DNA using X-ray intensity statistics, 387
— —, mitochondrial, isolated from human and mouse cells in culture, *in vivo* effects of intercalating drugs on the superhelix density, 255
— — molecules, unintegrated, physical and genetic properties during *Hemophilus* transformation, 223
— —, the nature of DNA associated with the nuclear envelope of regenerating liver, 517
— —, ring-shaped, of polyoma virus, identification of molecules at various stages of replication, 195
— — from vaccinia virus, replication in enucleated L-cells, 505

Derancourt, J. (see also Zuckerkandl, E.), 473
Dickerman, H. W. & Smith, B. C., Formylmethionyl transfer ribonucleic acid transformylase: the specific interaction of the enzyme with its transfer ribonucleic acid substrate, 425
Donohue, J., The crystal symmetry of DNA: Has it been proven?, 385
Dunitz, J. D. (see also Winkler, F. K.), 169

Electron microscopy, quaternary structure of glutamate decarboxylase of *Escherichia coli*, 215
Energy expenditure is obligatory for the downhill transport of galactosides?, 447
Enucleated L-cells, replication of vaccinia virus DNA, 505
Erythrocyte membrane, human, major protein, 351
Escherichia coli 113–3, synthesis of specific tRNA's during methionine starvation, 307
— —, fast-growing, symmetric multifork chromosome replication, 207
— —, quaternary structure of glutamate decarboxylase as revealed by electron microscopy, 215
— —, sequential biosynthesis of the β and β' subunits of its DNA-dependent RNA polymerase, 17
— —, termination of translation of messenger RNA in a temperature-sensitive mutant, 461
Ethidium bromide, does its intercalation wind or unwind the DNA helix?, 43
Euglena gracilis, synthesis and maturation of cytoplasmic ribosomal RNA, 491

Fan, H., & Penman, S., Regulation of synthesis and processing of nucleolar components in metaphase-arrested cells, 27
Fatty acid chains, a study of motion using lipid spin labels in lecithin multilayers, 77
Fenrych, W. (see also Huang, H. H.), 307
Formylmethionine tRNA transformylase, specific interaction with its tRNA substrate, 425
Fritsch, A., & Worcel, A., Symmetric multifork chromosome replication in fast-growing *Escherichia coli*, 207

Galactoside downhill transport, energy expenditure is obligatory, 447
Garfinkle, B. & Tershak, D. R., Effect of temperature on the cleavage of polypeptides during growth of LSc poliovirus, 537
Geiduschek, E. P. (see also Guha, A.), 329
Genetic control of the cell division cycle in yeast, 183
— and physical properties of unintegrated donor DNA molecules during *Hemophilus* transformation, 223
Gennari, G. (see also Jori, G.), 151
Glutamate decarboxylase of *Escherichia coli*, quaternary structure as revealed by electron microscopy, 215
Greenblat, J. (see also Schleif, R.), 127
Greer, J., Three-dimensional structure of abnormal human haemoglobins Kansas and Richmond, 99
